Personally sponsored member (often referred to as a "Direct")

A member who registered their MaVie account using your personal ID or your referral link.

Volume points (VP)

Volume points are the basis for calculating referral bonuses. Each member accumulates **Volume points** with purchases within his team, but they only get turned into bonuses once the member becomes a "Qualified Partner".

Spillover

Spillover is when new members are placed into your team by your upline. You in return have the ability to do the same for your team.

Binary structure

The Binary structure is made of two teams, one on the left and one on the right. This means that only two members can be placed on your first level, one left and one right. The third one and all the rest are placed in your lower levels.

Your binary structure consists of the members who were sponsored directly by you and your team. This includes members added by your upline (your sponsor and members above him) and anyone added by those positions. Any Member added by anyone above you that falls into your team is called spillover.

Unilevel structure

Every individual position has a unilevel structure, also known as one's "first generation". This simply refers to the members personally sponsored with an individual's referral link. Everyone can have many members in their first generation; there is no limit to the number of new members an individual can add.

Sponsor (Referrer)

You are a Sponsor to all the members who used your referral link or your ID ("Invite links") to register their MaVie account.

Upline

The member structure above your position in the compensation lineage, starting with your Sponsor.

Downline

The member structure below your position in the compensation lineage that splits into two sides (your left and right).

Personal sales

Represent the sum of all purchases made by your personally sponsored members.

Team volume points (Team sales)

Represent the sum of volume points generated in your left and in your right team.

Paid Team (Weaker team/leg)

Represent the sum of volume points generated in your weaker team, which is a team that generates lower sales volume than the opposite team.

Direct team volume

Is your unilevel sales volume, which is represented only by everyone's personal sales within your team.

Team bonus weekly cap

This is the maximum Team bonus that can be received in a period of one week.

Rank required volume (RRV)

A Direct team volume that needs to be achieved to be promoted to a certain rank.

Carryover

Is the remaining volume of your stronger team after the bonus calculation, which is transferred for the next calculation. At the same time, it is the difference between the left and the right team volume.

Referral bonuses

Referral bonuses are rewards that members receive for their contribution to the company's recognition and growth. These motivational bonuses encourage personal and team sales by offering help to your personally sponsored members as well as their teams.

Calculation of the bonuses

Direct bonus is calculated **immediately** upon the confirmation of the order, while the calculation of **all other bonuses** take up to **one hour**.

Understanding your team structure

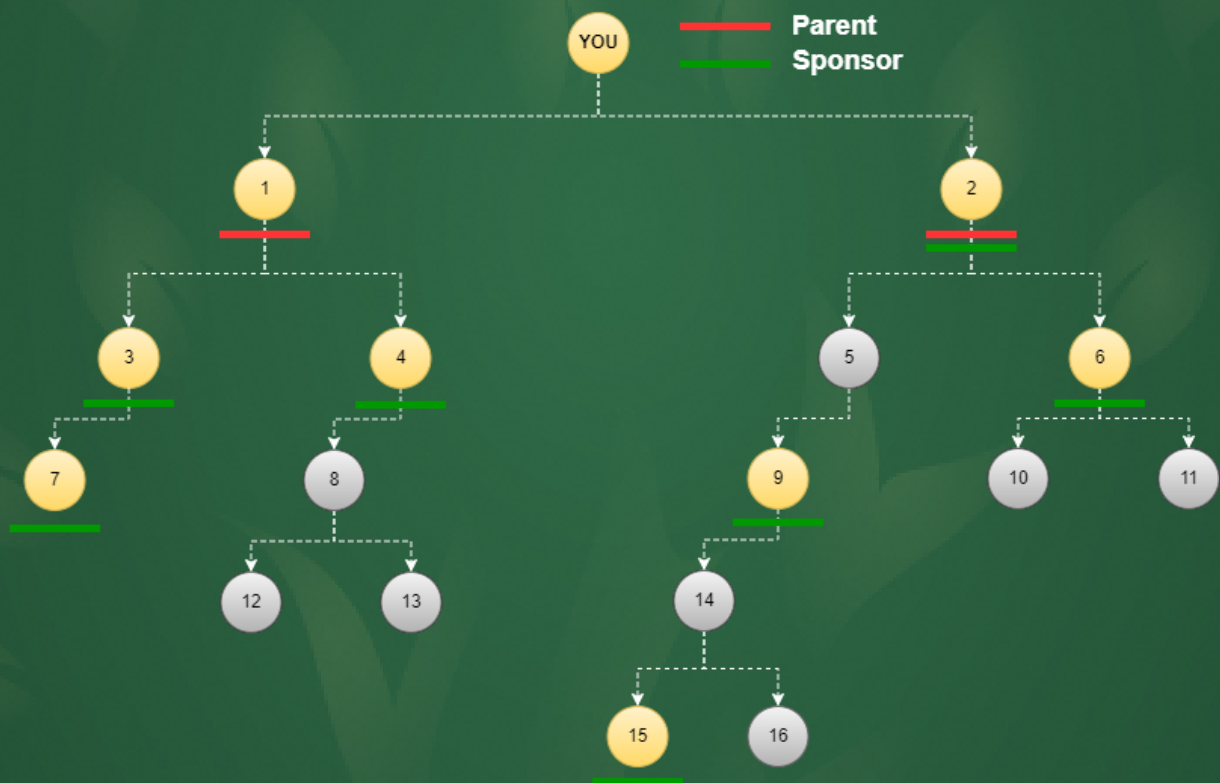

Sponsor vs Parent

You can be a Sponsor to an unlimited number of members, but you can only be a Parent to two members of your team, to those two who are directly attached to your position in the structure.

To them, you may be both a Sponsor and a Parent if they are directly registered through your referral link.

Please refer to the image below:

** No. 1 is a result of a Spillover, that's why you are only a Parent to No. 1 and not a Sponsor*

On the presentation image above, you are:

- ❖ a Parent to No.: 1 & 2
- ❖ a Sponsor to No.: 2, 3, 4, 6, 7, 9 & 15.

Levels vs Generations

The two members that are directly attached to your position represent your first level. Their first level represents your 2nd level and so on. The levels sequentially follow one another, where each new depth is considered a new level.

Your first Generation, on the other hand, starts with your personally sponsored members. If you sponsor a new member into your fourth (4th) level, this level represents your first (1st) Generation.

With personally sponsored members on your different levels, your generations also start on different levels. One Generation may start on your 1st level, whereas the other one can start on your 4th level, so one level may at the same time be your 1st and your 4th generation.

Team (Binary) structure

Direct & Indirect sales
personal, team & spillover

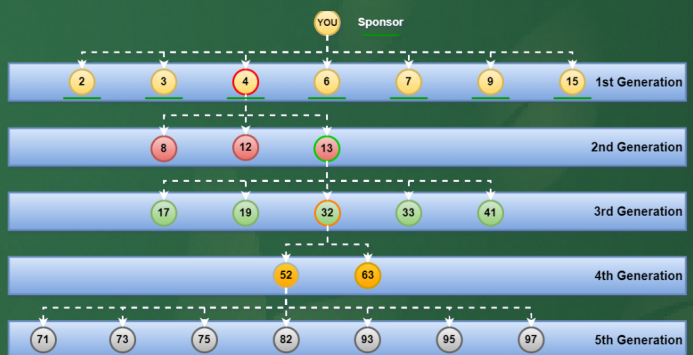

This structure contains all of your team members, the ones who were personally sponsored by you, the ones who they sponsored, and the ones who were sponsored by your uplines. The latter is called spillover.

This structure generates Team Volume.

This structure has levels.

Unilevel structure

Direct sales
personal & team

This structure is a **different view** of the Binary structure and it contains only personally sponsored members, yours and everyone else's within your team.

This structure generates Direct Team Volume.

This structure has generations.

This structure's volume is used to climb the ranks.

Ranks

Ranks play an important role in the Compensation plan, so it is good to understand how they work.

They define:

- ❖ Team Bonus weekly cap,
- ❖ Number of available/eligible generations for the Matching Bonus &
- ❖ The amount of the reward for the Career Bonuses.

Once a certain Rank is reached, it represents the member's minimum rank. The member can progress through higher ranks, but he cannot lose his existing one.

Rank qualifications

RANK	REQUIREMENT	BENEFIT
Customer	Registered account with MaVie	❖ Eligibility to a Direct Bonus ❖ Volume points start to accumulate.
Partner	One or more purchased Staking HUBs	
Qualified Partner	One personal sale in your left team and one personal sale in your right team. 1 L + 1 R	Volume points are calculated and turned into bonuses (within 1h).

Customer Rank

The first rank, which is Customer, is achieved by registering your account with MaVie. This enables you to receive a Direct bonus from all your personally sponsored members who buy a Staking HUB.

Partner Rank

You are promoted to the Partner rank when you purchase one or more Staking HUB - NFT. This allows you to accumulate Volume points from your left and your right team. These points are displayed on your back office dashboard.

Qualified Partner Rank

When one of your personally sponsored members from your left team and one from your right team buys a Staking HUB, you are promoted to Qualified Partner rank.

Within one hour after reaching this rank your volume points are calculated and turned into bonuses.

Higher Ranks

Higher ranks have sales volume requirement, described in the “*Ranks volume table*” below, which needs to meet the following 4 rules:

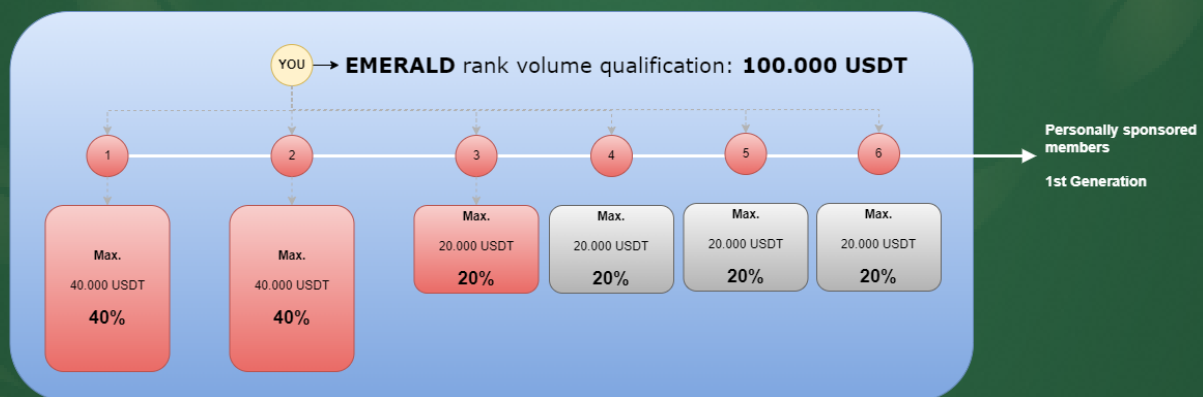

1. Volume of the weaker team

The volume required by the rank needs to be produced by the weaker team.

2. Minimum three (3) personally sponsored members are required. The more, the easier the next rank is achieved!

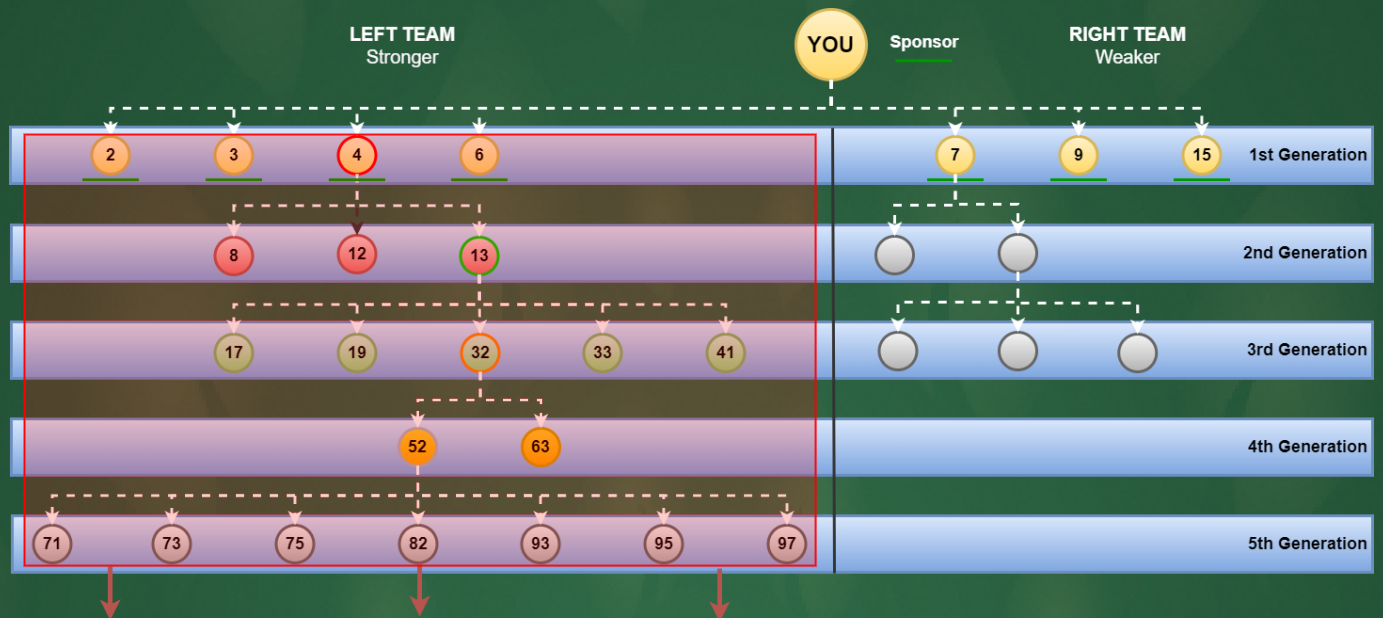

3. 40-40-20 rule

A maximum of 40% of the rank's required volume (RRV) from two personally sponsored members and a maximum of 20% of all other personally sponsored members is counted towards the total RRV (see examples below).

4. 10% rule

The 10% of the rank required volume must be generated from the stronger team's accumulated Direct volume.

The left team on the presentation image is a stronger team.

An accumulated sales volume of your personally sponsored members and their personally sponsored members, and so on, must present at least 10% of the rank's required volume.

Ranks volume table

RANK NAME	QUALIFYING CONDITION
CUSTOMER	Registered MaVie user
PARTNER	One or more own Staking HUBs
QUALIFIED PARTNER	One personally sponsored member in the left and one in the right team
SILVER	Required volume: 1.000 VPs (lifetime accumulated, weaker leg)
GOLD	Required volume: 3.000 VPs (lifetime accumulated, weaker leg)
PEARL	Required volume: 10.000 VPs (lifetime accumulated, weaker leg)
SAPPHIRE	Required volume: 25.000 VPs (lifetime accumulated, weaker leg)
RUBY	Required volume: 50.000 VPs (lifetime accumulated, weaker leg)
EMERALD	Required volume: 100.000 VPs (lifetime accumulated, weaker leg)
DIAMOND	Required volume: 200.000 VPs (lifetime accumulated, weaker leg)
BLUE DIAMOND	Required volume: 500.000 VPs (lifetime accumulated, weaker leg)
GREEN DIAMOND	Required volume: 1 MIO VPs (lifetime accumulated, weaker leg)
BLACK DIAMOND	Required volume: 2 MIO VPs (lifetime accumulated, weaker leg)
CROWN DIAMOND	Required volume: 5 MIO VPs (lifetime accumulated, weaker leg)
DOUBLE CROWN DIAMOND	Required volume: 10 MIO VPs (lifetime accumulated, weaker leg)
AMBASSADOR	Required volume: 25 MIO VPs (lifetime accumulated, weaker leg)
ROYAL AMBASSADOR	Required volume: 50 MIO VPs (lifetime accumulated, weaker leg)
THE G.O.A.T	Required volume: 100 MIO VPs (lifetime accumulated, weaker leg)

Example of the 40-40-20 rule

Andrew needs 10.000 VPs of (lifetime – never expires) from at least three personally sponsored members to achieve the PEARL rank.

Not more than 40% from two personally sponsored members and not more than 20% of the third and the following personally sponsored members are counted towards the rank's required volume points:

- ❖ 4.000 from one personally sponsored member (max. 40%),
- ❖ 4.000 from another personally sponsored member (max. 40%) and
- ❖ 2.000 from the third (3rd) personally sponsored member (max. 20%).

If Andrew doesn't have enough Direct volume points (VPs) for the full 40-40-20 distribution from his three personally sponsored members and he has more than three personally sponsored members, then each of the following personally sponsored members can also contribute max. 20% of the Direct volume towards rank's required volume.

Here are 5 different cases of using the **40-40-20 rule**:

Direct Bonus (10%)

A Direct Bonus is the only bonus available to users who didn't purchase their own STAKING HUB - NFT, meaning they have a Customer status in our organization.

A direct bonus is a one-time bonus that a member receives for every new personally sponsored member who purchases a "STAKING HUB - NFT".

The bonus is in the amount of **10% of the received Volume points** from the purchased "STAKING HUB's - NFT".

Conditions to receive a Direct Bonus:

- ❖ Completed registration,
- ❖ Completed KYC.

A Direct Bonus reward is available to everyone who meets the two conditions above.

As stated at the beginning, it is also available to members with a Customer status - members who didn't purchase a "STAKING HUB - NFT" for themselves.

Cashback bonus

A cashback bonus is a bonus that allows users to receive a 100% cashback for the payment of their own STAKING HUB - NFT.

This bonus can be achieved in the first **30 days after the user's registration**.

Cashback bonus qualification:

- ❖ Five (5) personally sold STAKING HUBs - NFT in the same or a higher value as the first own Staking HUB purchase
- ❖ Become a Qualified Partner (at least one Partner on the opposite team)

In this case, 50% of the user's STAKING HUB - NFT value is added as an additional reward, next to regular Direct bonus rewards.

50% BONUSSES + 50% COMPANY REWARD = 100%

This way, the full purchase amount can be compensated.

Team Bonus

also known as the “Binary Bonus”

Team bonus qualification

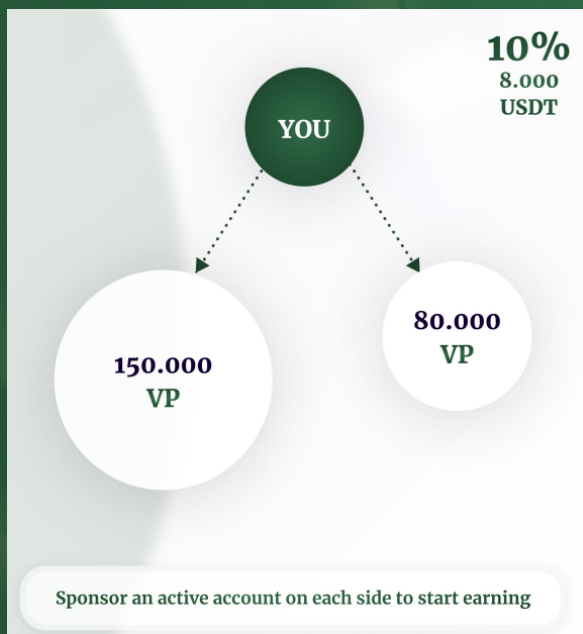

You qualify for a team bonus by achieving the Qualified Partner rank.

Team bonus calculation

Your team is made of two parts, your left side, and your right side. You start earning your team bonus as soon as you have one sponsored member on your left and one on your right.

Your accumulated left and right team sales volume form your total sales volume, which is expressed in Volume Points (VPs).

A Team Bonus is a bonus in the amount of **10% of the sales volume generated** in your weaker team (often referred to as a “leg”).

Each purchase in your weaker team represents a new bonus for you:

<u>Staking HUB</u>	<u>VPs</u>	<u>Bonus 10%</u>
300 USDT	300	30 USDT
500 USDT	500	50 USDT
1.500 USDT	1.500	150 USDT
5.000 USDT	5.000	500 USDT
12.500 USDT	12.500	1.250 USDT
30.000 USDT	30.000	3.000 USDT
100.000 USDT	100.000	10.000 USDT
300.000 USDT	300.000	30.000 USDT

Example:

- ❖ Left team sales volume: 150.000 VPs (Volume Points)
- ❖ Right team sales volume: 80.000 VPs (Volume Points)

In this case, you would get a bonus of 8.000 USDT (10% of 80.000 VPs).

Each new purchase within your weaker team represents a new bonus (from 10 to 30.000 USDT).

The “USDT” (Tether) stands for crypto USD, where 1 USDT equals 1 USD (US Dollar).

IMPORTANT NOTE

- ❖ The Volume Points of the stronger team are carried over to the next calculation, they never expire.
- ❖ The Lifetime sales volume of your both teams is accumulated.
- ❖ There are no monthly qualifications. Once a user achieves a certain Rank, it is permanent and he can only progress to a higher Rank.

Team bonus weekly cap

Team bonus earnings are limited by your rank's weekly cap. This means that the sum of your weekly team bonuses received cannot exceed the weekly cap of your current rank.

Reload Bonus

All the bonuses that users receive are divided into three accounts, whereas 75% goes automatically to the user's USDT balance, which is immediately available to withdraw, 15% to the ULX buyback balance, and 10% to the user's Club balance.

A Reload bonus is generated when team members are buying Staking HUBs using their Club balances, so this bonus can be considered a consequential, automatic bonus.

These purchases generate all the regular bonuses, except for the Direct bonus, which is only available through the USDT purchases.

The ULX buyback balance is used to purchase ULX coins from the Ultron Swap DeFi exchange, while the Club balance is used for purchasing new STAKING HUBs - NFT.

Hodl Pool bonus

Hodl (hold/lock/stake) your assets and get rewarded with a passive monthly bonus, forever!

Each Staking Hub NFT gives you a ticket in its own poll and one ticket in each of the lower pools!
